EDUCATION

Air University   **Islamabad**
B.S in Information Technology   *Expected Graduation: May 2025*

Aspire College   **Jhelum**
Pre-Engineering   *2019-2021*

WORK EXPERIENCE

Globosoft Technologies
Web Developer Intern   *June 2023-Sept 2023*

- Developed a variety of web applications utilizing HTML, CSS, JavaScript, PHP, and MySQL.
- Collaborated with senior developers to understand project requirements and deliver solutions that meet client specifications.
- Participated in code reviews and contributed to improving code quality and performance.
- Gained hands-on experience with full-stack development and learned best practices in web development and design.

CERTIFICATION

- Introduction to HTML5 Certification – Coursera
- Interactivity with JavaScript Certification – Coursera
- JavaScript Programming Essentials – Coursera
- Introduction to Structured Query Language (SQL) Certification – Coursera
- Building Database Applications in PHP Certification – Coursera
- Building Web Applications in PHP Certification – Coursera
- Getting Started with Git and GitHub – Coursera

PROJECTS

- **Parcel Buddy (php)**

Developed a web application for logging and tracking parcel deliveries using PHP, MySQL, and HTML/CSS. Implemented core functionalities following the MVC design pattern, including user authentication, delivery record management, and a responsive layout.

- **Job Portal Web Application (php)**

A website that has jobs stored into the database; a user can apply to this job after registering their account. They can view all the jobs they have applied to, as well as recover their account through pin sent to their emails. The passwords of each user is stored into the database after being md5 hashed.

- **E-commerce website (php)**

This website allows users to browse, search, and purchase products. Sellers can list their products for sale, and administrators can manage the platform.

- **Employee Management System Website (php)**

This website allows administrators to add, view, edit, and delete employee records.

- **To-do Task Website (php)**

This website displays the list of tasks from the database on the web page. It has the ability to mark tasks as completed and update their status in the database.
